calculate the cost of setting up an apartment or redecorating a home

directions

Each team member should pick one room (choices include kitchen, dining room, bedroom, living room, and bathroom). Research how much it would cost to furnish and equip the room. Consider various alternatives, including secondhand stores, garage sales, donations from relatives, etc.

1. What items did you include?

2. What was your source for each item?

3. What was the total cost?

4. How did the total compare to what you expected?
